

Storage and Shelf Life information

- We seal our products with Nitrogen to eliminate any oxygen in the package. Once the product has been opened the shelf life is about one to two weeks. Product that has been refrigerated can last up to 4 weeks.
- We recommend that you store all roasted nuts in a cool, dark place. Ideally the refrigerator would be the best option to storing opened product.
- Raw nuts which have been opened can last up to 1 year if they are stored in the freezer.
